SUMMARY

Java backend developer with hands-on experience building secure, enterprise-grade REST APIs using Spring Boot, Spring Security, JWT, and Hibernate/JPA. Proficient in object-oriented programming, layered architecture design, and role-based access control with Spring Data JPA and SQL (MySQL). Committed to delivering scalable, production-quality backend systems with robust exception handling, clean code practices, and a strong focus on API security and performance.

TECHNICAL SKILLS

Programming Language: Java

Backend Technologies: Spring Boot, Spring MVC, Spring Security, Hibernate (ORM), Spring Data JPA, Servlets, REST APIs

Security: JWT Authentication, BCrypt Password Hashing

Database: SQL, MySQL

Frontend: React, Tailwind CSS, HTML

Tools: Git, GitHub, Maven, IntelliJ IDEA (Community Edition), Docker (basic containerization)

API Testing: Postman, Hoppscotch

PROJECT

AI Employee Management System (AI-EMS)

Java, Spring Boot, Spring Security, JWT, Hibernate, Spring Data JPA, MySQL, Maven, REST APIs, React, Tailwind CSS, HTML

- Designed and developed a secure, enterprise-grade HR system automating employee records, attendance, leave, payroll, notifications, and reporting.
- Engineered a layered architecture (Controller → Service → Repository → Database) aligned with RESTful API principles and MVC patterns.
- Secured the application using Spring Security and JWT-based authentication with role-based access control and BCrypt password hashing.
- Built REST APIs across Employee, Department, Attendance, Leave, Holiday, Payroll, Profile, Notification, Dashboard, and Reporting modules.
- Implemented input validation and CRUD operations with optimised Hibernate/JPA queries on SQL (MySQL).
- Integrated dependency injection and inversion of control (IoC) via Spring Core, improving modularity and testability of backend services.
- Built a responsive React frontend styled with Tailwind CSS, consuming backend REST APIs and managed project builds with Maven.
- Integrated a Generative AI (LLM) API to enable intelligent HR automation features including AI-assisted analytics, smart report generation, and automated employee insights.
- Tested and validated all REST API endpoints using Postman.

EDUCATION

Master of Computer Applications (MCA) — Dr. D. Y. Patil Vidyapeeth, Pimpri, Pune | 2026 – 2028 (Currently Pursuing)

Bachelor of Computer Applications (BCA) — GH Rasoni University, Amravati | 2023 – 2026 | CGPA: 8.81

CERTIFICATIONS

- Java Certification — Apna College (Sigma Batch)
- All India NCAT (AINCAT) 2025 — Certificate of Participation, Naukri Campus (May 2025)
- Hackathon Participation Certificate — GH Rasoni University (March 2025)

KEY COMPETENCIES

Backend Development · REST API Development · Authentication & Authorization · MVC Architecture · Object-Oriented Programming · SQL · Clean Code · Debugging · Problem Solving

ACHIEVEMENTS

- 1st Rank, Cricket — College Sports
- 2nd Rank, Table Tennis — College Sports
- Solved coding problems on LeetCode
